## WILD POKÉMON LOCATIONS

As a "649" hack/mod/whatever, the wild encounters for every area in the game have been edited to allow you to capture whatever you wish. Encounters are split by area, and all possible encounter methods are shown together with the possible Pokémon, their levels and their percent chance of appearing. Please note that in the case of Surf/Fishing Pokémon, the level shown is generally a median average. Almost every Pokémon is available before the Elite Four are battled the first time, and generally before the seventh badge has been obtained. The main exception is probably Phione, as well as a fraction of the legendaries.

For starter Pokémon, some can be found in the Hidden Grottos but you'll be able to obtain three out of the twelve as a gift. Check the "Starter & Legendary Guide" document for full details. For Hidden Grottos, please jump to page 86. They are listed in the order you are able to access them (assuming that you don't get moves such as Surf earlier than you should do.)

Also, where areas have seasonal variation; the encounter list is shown in full for all four seasons, but season-exclusive Pokémon are highlighted in purple.

But otherwise, enjoy the variety! For the first half of the game, you'll be able to find new Pokémon in pretty much every new area. Any Nuzlocke challenges should be interesting.

# Blaze Black Volt White<sup>2</sup>

## POST-GAME LOCATIONS

The post game areas obviously are inaccessible until you beat the League initially, thus the levels of the Wild Pokémon and such are fairly high in comparison to most of the routes you've seen prior.

The postgame also allows you to catch legends and unlike the first Blaze Black and Volt White games, the legends are all one time encounters that are found in places around Unova. Their locations are listed in a different document - check that for more details, as most of the legends are not listed in this one.

You should have already been able to capture nearly everything that isn't a legend or Phone, but the postgame areas present some fairly high level wild Pokémon which might be good if you need to replenish a Nuzlocke team or something like that...

At any rate, the world is your oyster. Feel free to try the second round E4 for a final challenge, or go around and collect the remnants of what your PokéDex needs. You should already be equipped to go to the Nature Preserve if you battled the majority of the trainers in the main game; just talk to Juniper to get the item you need for access.

# Blaze Black Volt White 2

## HIDDEN GROTTO POKÉMON

A new feature in Black 2 and White 2 is the Hidden Grotto mechanic; a small "cave" between two trees in certain routes that has the chance of generating a Pokémon who has its Dream World ability.

The Hidden Grottos have had their Pokémon switched around in order to both provide a place for the starters (and some legendaries) to appear as well as make the good Dream World abilities available even for those who are playing the Vanilla version. Those of you playing the Complete one will be able to get the majority of these abilities anyway, but there's still a couple like Scrappy Stoutland and Iron Fist Conkeldurr that you might be interested in obtaining. Note that all Pokémon in the Grottos now have a 50% chance of being female, except for gender exclusives.

Pokémon generation in the Grottos is generally quite rare, so using the cheat codes provided in the action replay document that both make regeneration instant and always a Pokémon is highly recommended when hunting for things here.

Don't forget to note that many of your in-game opponents will be using Dream World abilities regardless of what version you're playing, so those of you who are doing the Vanilla will need the Grottos if you want to keep your Pokémon choices on par with the AI!
