

# Blaze Black Volt White<sup>2</sup>

## ITEM & TRADE CHANGES

As with the first Blaze Black and Volt White, many of the item balls you pick up around the region have had the items inside them changed, to allow you to pick up many TMs much earlier than the original game, which generally forces you to get some of the nicer TMs (Earthquake, Stone Edge) after you've beaten the Elite Four.

You're also able to get other important items such as evolution stones and such a lot earlier, since of course, a lot more Pokémon are now available for you to use. Wouldn't be much fun if you couldn't evolve them to their last form!

Although not mentioned elsewhere in the document, there's also been changes to a couple of the secondary PokéMarts in cities. Virbank City now holds Luxury Balls, the Driftveil City holds all the four shards and Heart Scales, and the Route 9 Dept. store now holds a huge assortment of evolution items. This Route 9 store is key for the Electirizer, Magmarizer and Dubious Disc, so don't forget it's there!

Every trade in the game that isn't done by Yancey/Curtis has also been edited. The postgame ones have simply had an IV boost, but the three pre-credits trades have all got new Pokémon to get, and want new Pokémon to be given to them. Everything's available anyway, of course, but some of them can be useful...

# Item Changes

## Aspertia City

---

🍷 Poké Ball \* 10 --> Poké Ball \* 30 [Gifted]

## Route 19

---

# Trade Changes

All Pokémon you receive have IVs that are 30 across the board. The full list is only shown for the first three trades, as the post-game trades have not had any changes aside from having their IVs raised to 30 each.

## ROUTE 4 TRADE\*

WHAT YOU GET	POKÉMON INFORMATION	WHAT THEY WANT
